

Career Progression Gateway

Version 2 Features

The Assessment System

The Career Progression Gateway (CPG) online assessment system makes the process more convenient for candidates and more efficient for organisations to administer and run.

We are constantly working on improvements and new features based on the requests from our clients. Version 2 is now live and has the following new features-

New Features

- Candidates can format answers (Bold, italic, text align etc) like in MS Word;

- Candidates have an 'undo' button in case they make a mistake;
- Auto resize of candidate answer box to fit the screen. Candidates can also manually resize if required;
- 'IT Check' page where local IT can confirm onscreen that typed answers are being auto-saved correctly;
- Candidate auto-log out after the assessment has finished;
- Feedback reports now include development statements and a red/ amber/ green performance rating.

Leadership Quality: Personal Impact	Minimal Development Areas
Leadership Quality: Outstanding Leadership	Several Development Areas
Leadership Quality: Service Delivery	Several Development Areas
Leadership Quality: Organisational Effectiveness	Meets Required Standards

Behind the Scenes

- Ability to create assessments in minutes and seconds;
- Improved candidate answer save function, now updates in real-time;
- Create a prepopulated assessment with the candidates last answer, perfect if the candidate has ended the assessment by accident;
- If a candidate ends an assessment early, time displayed to admin on how long they had left;
- Assessors can monitor time to call for the roleplay exercise on front-end webpage.

Coming December 2020

- Candidates will have the ability to highlight text in the background information;
- In the situations where the internet connection is dropped, an alert is shown and the assessment can be saved as a Word document at the end of the assessment.
